Career Objective

As a MERN Stack web developer with talented, innovative, enthusiastic, quick learner and hands on experienced web developer with strong dedication to code in order to help building functional, scalable and responsive web applications. Have the capability to work closely with other developers and creative team members. I continuously learn and expand my knowledge of the latest technologies.

Technical Skills

- **Front End:** HTML, CSS, Bootstrap, Tailwind CSS, Material UI, JavaScript, React.js, Redux Toolkit, Typescript, Next.js, Firebase.
- **Back-End:** Node.js, Express.js, Typescript, Mongoose, MongoDB.
- **Tools:** Github, Figma, Imgbb, Netlify, React Firebase Hook, JWT, React Query, Axios, React Form Hook, Postman, Compass, Heroku, Vercel, Trello, OpenAI.
- **Learning:** Python, SQL, React Native.

Projects

Study with Scholar

Links: [Live Site](#) | | [Github \(Server\)](#) | | [Github \(Client\)](#)

Key Features:

- A web application for online learning platform where students can buy courses.
- Host server side authentication system with **JWT**.
- Implemented protected Routes where **user/teacher/admin** can perform their role.
- A valid user can purchase a course in Dashboard by **Stripe Payment System**.
- Students can get support by submitting their problem in the student support route.
- Anyone can write and post any **Blogs** without being a user.

Technology & Tool Used: React.js, React Router, React Form Hook, Redux Toolkit, React-Chart.js, Tailwind CSS, ImgBB, JWT, Node.js, Express.js, Mongoose, MongoDB, Vercel, Netlify.

Fresh Juice Bar

Links: [Live Site](#) | | [Github \(Server\)](#) | | [Github \(Client\)](#)

Key Features:

- A web application for Fresh Juice Bar where clients get fresh Juice, Bowls and Coffees.
- Have protected Routes where users can buy foods.
- Host server side authentication system with **JWT**.
- Anyone can send Feedback or Contact with a Host without being a user.
- Use Typescript in Front-End & Back-End Both Sides.

Technology & Tool Used: React.js, React Router, Typescript, React Form Hook, Context API, JWT, Netlify, Tailwind CSS, Node.js, Express.js, Mongoose, MongoDB, Vercel.

Fresh Fruits Warehouse

Links: [Live Site](#) | | [Github \(Server\)](#) | | [Github \(Client\)](#)

Key Features:

- A web application for product warehouse management.
- Created secured authentication system using firebase.
- Developed secure Routes where users can manage inventory items like add items, delivered, restock and delete items.
- A valid user can change user role in Dashboard.
- Anyone can send Feedback or Contact with a Host without being a user.
- In the inventory section have pagination where users can go to any page for their desired Fruits.

Technology & Tool Used: React.js, React Router, React Form Hook, React Query, JWT, Firebase, Tailwind CSS, Node.js, Express.js, Mongoose, MongoDB, Vercel.

Professional Course

Course: *Complete Web Development Course* at Programming Hero.

Duration: Jan 2022 – June 2022.

Extra-curricular Activities
